Credits: 9

Matter: Psychology of group

Main language of instruction: Italian

Other language of instruction: English

Teaching Staff

Head instructor

Prof. Elisa Miragliotta- elisa.miragliotta@unicusano.it

Introduction

1. Objective of the course :

The course has the following formative objectives:

- A. Presentation of the different models of psychodynamic understanding of operation of groups
- B. Introduction of the theory and practical aspects related to the clinic through the group
- C. Presentation of the main models and possible applications of group psychology in organizational and institutional contexts

Objectives

2. Course Structure:

The course is developed through the pre-recorded audio-video lessons that compose, together with slides and handouts, the study materials available on the platform, and provide for the deepening of the contents of the individual modules that make up the program. Self-assessment tests are proposed, asynchronous, which accompany the pre-recorded lessons and allow students to ascertain both the understanding and the degree of knowledge acquired of the contents of each of the lessons. The interactive teaching is carried out in the forum of the "virtual class" and includes examples and discussions on the psychodynamic evaluation and on clinical cases with the involvement of the students

Competencies:

- Knowledge and ability to understand

At the end of the course the student will have proved to know the different theories of understanding the functioning of the groups, having acquired the ability to analyze them.

- Application of knowledge.

The student will be able to use the knowledge of the Psychology of the groups having learned the thought of the authors treated.

- Communication skills.

the student will be able to describe specific characteristics of the groups and on the different application fields, using appropriate terminology.
